About Me

As a Full Stack developer, I bring over **2 years** of experience in **Full-Stack development** mostly using **Flutter & Firebase**. I began my professional journey in software development with **Flutter**, during which I independently developed and published 2 web application projects and 2 mobile application, collaborated on **over 10 projects**, emphasizing teamwork and effective communication.

In my project engagements, I have integrated AI services such as **ChatGPT and DALLE**, alongside payment services including **Stripe, Google Pay, Apple Pay, and PayTR**. I have undertaken both front-end and back-end development responsibilities, predominantly utilizing **Firebase and Google Cloud** services for the backend infrastructure. Throughout the development lifecycle, I have adhered to **Agile Methodologies** and leveraged version control systems effectively.

Moreover, my passion for **music** has often intersected with my professional endeavors. Currently, I am immersed in a project focused on processing and visualizing live sound data by applying various algorithms to convert it into frequency data.
